## EDITION SUMMARY

The Shib 63rd edition:

### **The Turnkey Solution**

#### **1. SHIB PREVIEW**

The Art of Integration: A Digital Symphony

#### **2. SHIB SPOTLIGHT**

The Dawn of Shib OS: Powering  
the Decentralized Future

#### **3. DETECTIVE SHIB**

The Kernel of the Shib OS

#### **4. TAIL OF THE SHIB**

The Digital Portal and the Heart of the Shiba Inu Ecosystem

#### **5. SHIB 101**

Shiba Inu OS FAQs

#### **6. ALPHA INSIGHTS**

Crypto's Crossroads: Navigating the  
Future Under a Trump Presidency

#### **7. COMMUNITY CORNER**

ChewySwap Launches All-New TREAT Farming,  
Bridges, and DEX Aggregation!

#### **8. DOGGIE TREATS**

# GM Shib Army!

We're pleased to present the 63rd edition where we explore the art of integration and how an operating system serves as the turnkey solution for every country, government, community, and industry.

Explore the Shiba Inu Operating System, your all-in-one access to a comprehensive suite of tools and services working together as one integrated structure.

Say hello to the SHIB Alpha Layer, an FHE-powered Shibarium, and FHE-optimized Execution Rollups.

At the heart of this movement lies Shib.io, the official Shiba Inu website, which is strategically positioning itself as the core hub of this digital universe.

Learn more about the operating system through the FAQs column in this edition.

And as the degens continue to navigate the Wild West of the digital realm, let's reflect on how political dynamics can potentially affect the crypto sector.

Don't miss this week's Community Corner, featuring ChewySwap's innovative DeFi tools designed to enhance your Shibarium experience!

Are you ready to dive in?

# The Art of Integration: A Digital Symphony

In a world of fragmented digital landscapes, a new breed of architects is emerging, crafting unified systems that promise to redefine how we interact with the decentralized future.

Success in any field is often defined not by individual achievements but by the ability to build systems that stand the test of time.

From the rise of ancient empires to the intricate networks of modern technological titans, a fundamental truth consistently emerged: enduring success stems not from isolated accomplishments, but from the artful construction of self-sustaining systems — a carefully choreographed dance of interconnected elements.

Consider, for instance, the visionary endeavors of Walt Disney, whose creative reach transcended the silver screen to embrace the [expansive realms](#) of theme parks and the pervasive influence of television, fashioning a world where each distinct component reinforced the others in a perpetual cycle.

Or, contemplate the strategic evolution of Microsoft, whose transformation from a mere software vendor into a provider of cloud infrastructure, enterprise solutions, and gaming platforms was not a haphazard expansion, but rather a deliberate weaving of core capabilities into a seamless, all-encompassing fabric.

And, we cannot ignore the far-reaching influence of Google, which transformed from a simple search engine into a global force, whose technology powers countless applications, devices, and services worldwide, showcasing the power of a truly integrated system.

These historical parallels offer a lens through which to view the ongoing transformation within the digital domain, specifically within the nascent realms of blockchain and decentralized pieces of [technology](#). The growing chorus demanding simplification and cohesive interfaces has fueled a wave of innovation focused on the act of centralizing decentralized frameworks, where platforms capable of harmonizing diverse components, while offering frictionless user experiences, stand to reshape how individuals and institutions interact with the emerging landscape of Web3.

The challenge lies not simply in the creation of new technologies, but in the orchestration of those into holistic systems that are greater than the sum of their parts. The success stories of the past — from Disney's interconnected universe to Microsoft's integrated technology stack, and the ubiquitous presence of Google's services — underscore the importance of creating environments where each element contributes to the overall health and resilience of the whole.

This requires a keen understanding of both the technical and human elements of the equation. It requires, in essence, a profound [sense of design](#).

This emphasis on design is not merely aesthetic but fundamentally about functionality and usability. In the context of decentralized tech, design principles dictate whether a platform will become a niche application or a cornerstone of widespread adoption.

The ability to provide seamless experiences, to reduce friction, and to unify otherwise disparate functions is paramount. The best platforms will be those that offer intuitive workflows, thus removing the need for users to navigate complex and disjointed systems.

Moreover, this push toward unified access is a response to the growing realization that true decentralization requires, ironically, a degree of centralization at the point of access. It is not enough to have decentralized technologies; those technologies must also be accessible and understandable to a broad audience.

This is what has been driving innovation in platform design, with a focus on creating user experiences that mirror the ease of traditional, coordinated systems [applications](#), but which maintain the trust and resilience of decentralized systems.

The evolution of digital infrastructure requires not only the development of cutting-edge tools, but also the creation of environments that can facilitate their widespread use. This means thinking beyond technical prowess to consider the broader needs of the [users](#), as well as the strategic considerations of creating a system that can adapt and thrive over time.

It requires a vision that is both technically innovative and profoundly human-centered. It calls for a new breed of ecosystem architects capable of seeing the forest for the trees and orchestrating technologies into a coherent, functional whole.

In this context, we turn our attention to the strategic framework of shib.io, the central hub, which acts as the primary access point to the [Shiba Inu Operating System](#) (Shib OS). By consolidating core functionalities under a single, unified website, fueled by [TREAT](#), the ability to navigate SHIB OS is made seamless, it exemplifies how a well-articulated vision can redefine digital engagement and set new benchmarks in an industry that is still rapidly evolving.

Shiba Inu's vision is for a future where we see "Powered by Shiba Inu" appear on projects, technologies, and infrastructure across countries, governments, and communities, mirroring if not exceeding Google's reach and influence.

This story is no longer about a meme coin or only about technology but a narrative of innovation, strategic design, and the relentless quest for a cohesive and user-friendly digital frontier.

The story continues inside.

# The Dawn of Shib OS: Powering the Decentralized Future

Shib OS is a turnkey solution, fueling a decentralized future where power and innovation are readily accessible to all.

What if the power of the internet could be harnessed, not by a few, but by all? What if digital societies were not just passive recipients of technology, but active architects of their own digital destinies?

In a world increasingly defined by decentralized ideals, the promise of a truly community-driven digital society has never been more compelling. Today, we see not just the potential, but the realization of such a future in the form of the [Shiba Inu Operating System](#) (Shib OS) — a pioneering example of a turnkey ecosystem designed to empower users, providing all-in-one access to the decentralized future.

Imagine an operating system that brings together all necessary tools and services under one roof, functioning as a cohesive and integrated whole. This is the concept at the heart of Shib OS — a system where every component is designed to work together seamlessly, providing users with a holistic and user-friendly experience.

Fueled by \$TREAT, the access token to its vast ecosystem, Shib OS unlocks a world of possibilities, giving users the power to navigate, interact, and shape their decentralized future. And with 36 chambers of tech, Shib OS offers a comprehensive array of technologies, building the future of decentralization.

## The Shib OS Foundation: Core Infrastructure

The foundation of any robust system lies in its infrastructure, and Shib OS is no exception. The heartbeat of this network state is the [Shib Alpha Layer](#), which delivers ultra-fast transactions with sub-100ms finality and high throughput. This modular, rollup-agnostic layer ensures flexibility and scalability, allowing the system to adapt to evolving demands.

Sitting atop this foundation is [Shibarium](#), a Layer-2 solution that leverages Fully Homomorphic Encryption (FHE) to enhance privacy and security. With over 800 million transactions and 2 million wallets, Shibarium is a testament to its robust and efficient design.

Adding another layer of capability, the [FHE-Powered Execution Rollups](#) (Layer 3), built on the Alpha Layer, enable private and efficient execution of complex operations. These make the ecosystem capable of handling a wide range of applications, from financial transactions to complex gaming environments. The robust infrastructure, with its layered approach, ensures both speed and security, setting the stage for a seamless user experience.

## Shib OS: Identity, Security, and Privacy

Central to the vision of Shib OS is user control and security. The FHE-Powered Identity Stack provides verifiable credentials and one-time KYC using FHE, and allows for privacy-preserving identity management across the entire network state.

This means users can interact, perform transactions, and participate in governance without revealing sensitive information unless explicitly necessary. The Shib Attestation Service further enhances this trust, enabling the creation and assignment of reputations for any identity, user, or business within the system, allowing users to gain trusted access to more parts of the operating system.

With these systems, the Shib OS empowers users with a complete solution for self-sovereign identity principles, allowing them to engage in sensitive transactions securely, all while maintaining full control over their data, sharing it only when necessary.

## Community, Social Interaction, and Communication

The Shib OS is created for the thriving digital community. At its center is [Super HUB FUN](#), which acts as the primary social network and discovery hub that connects all parts of the ecosystem with a built-in bonding curve model. It is the home for discovering everything within the network, providing users with the ability to form connections with all parts of the ecosystem.

The HUB Messaging platform presents a decentralized communication layer with FHE-enhanced security, offering token gating, paid memberships, and seamless integration with the [Doggy DAO](#) for decentralized governance. These platforms combine to form the social fabric of the operating system, creating a ready-to-use social network for all users.

Further, the official publications [The Shib](#) Magazine and The Shib Daily keep the community informed, with the magazine's collectible NFT covers and the daily news service's reach beyond the ecosystem.

## Governance and Decentralized Finance

The heart of Shib OS' governance structure is the Shiba Inu Doggy DAO, an on-chain framework that empowers Shibizens to participate in decision-making. It provides flexibility with configurable DAOs for each state, all while adhering to a 1-citizen-1-vote model.

For active engagement and participation within the system, BURY 2.0 acts as a vote-escrow staking contract, which provides multi-purpose staking of various tokens (\$SHIB, \$LEASH, \$BONE, \$TREAT) for governance and DeFi benefits. WOOF Wars is the dynamic gauge voting system, where users stake [veTREAT](#) to influence liquidity farming rewards, bringing financial autonomy to the community.

For financial and economic access, [Shib Finance](#) is a comprehensive DeFi suite built around ShibaSwap, featuring reputation-based lending and borrowing options, and integrating Identity, Karma, and Reputation systems. SHIB Pay further empowers the economic system, with an on-chain, permissionless system that enables websites and merchants to accept crypto payments, helping build a decentralized economy.

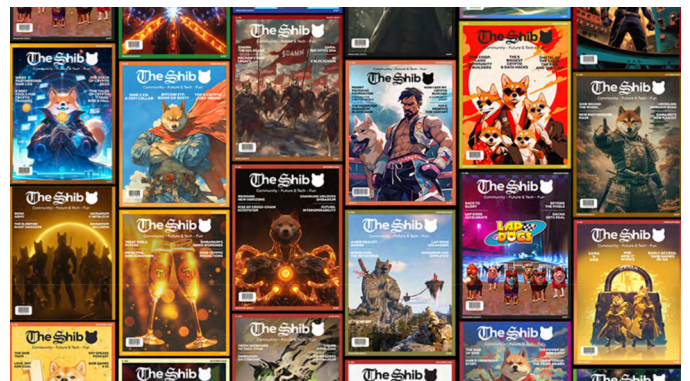

## Engagement, Rewards, and the Metaverse

Engagement within the system is key to long-term growth. The Karma Engine rewards positive ecosystem actions, contributing to a trustworthy environment where users are encouraged to contribute to a better community.

The Gamified Rewards Platform is a permissionless system for building giveaways, rewards, tournaments, and airdrops, further encouraging active involvement. The unique SHIBOSHIS and SHEBOSHIS collectible NFTs provide access to exclusive social clubs and gaming experiences, and promote community engagement and community building.

And for a truly immersive experience, Shib: The Metaverse, built on Unreal Engine 5.4, provides an ultra-realistic digital world with 12 HUBs and opportunities for land ownership and revenue generation. The Permissionless Tournaments Engine empowers the community by allowing any user to create or sponsor tournaments, bringing new dimensions to engagement within the system. Further, users can collect exclusive The Shib NFT Collection, which are collectible NFTs based on the covers of The Shib Magazine.

## Development, User Experience, and Tools

With user friendly, plug and play tools, the ease of access is enhanced by the Shib Account Abstraction & Gasless SDK, which enables gasless transactions, making the ecosystem more accessible. Shib Name Service (SNS), with its "name.shib" addresses, simplifies interactions and aims for official ICANN recognition, further legitimizing the system.

Shib Wallet provides a seamless multi-chain wallet experience that features a comprehensive portfolio tracking and smart functionalities. And for decentralized trading, the Shib Marketplace is a gasless NFT marketplace on Shibarium, fostering creativity and digital asset trading.

## Analytics, Advertising, and Outreach

For transparency and data-driven insights, the [Network State Analytics Engine](#) calculates key metrics like GDP and TVS, giving users a clear overview of the health of the system. The Woofvertising advertising engine enables on-chain campaign creation while preserving user privacy. And for effective marketing and outreach, the ShibArmy Influencer Marketplace connects verified influencers with brands, ensuring transparency and trust.

The Shiba Inu Core team is constantly looking for new ways to innovate and push the boundaries of technology. The AI Agents Dashboard is a platform where users can create, own, and participate in AI-driven agents managed by the community through a DAO. The new standard NNFTs, which enables tokens to convert to NFTs, unlock new use cases for gaming and DeFi.

Further, the Shib Events and Ticketing Engine provides an on-chain platform for creating and managing tickets for events within the ecosystem. And lastly, for total user control of data, Encrypted Personal Data Storage is a self-custodial solution that offers fully encrypted, permissioned data storage based on IPFS.

## The Shiba Inu OS and Beyond

The Shiba Inu operating system, powered by \$TREAT, represents a novel approach to building decentralized ecosystems. This is where cutting-edge technology serves a vision driven by the community, empowering individuals and enabling them to interact on their own terms. The creation of Shib OS marks not just a milestone, but a turning point in how decentralized technologies are utilized. It gives users a new and more complete system to interact with the future of digital technology.

The potential for future growth and [innovation](#) within this complete solution is immense, and the impact Shib OS has on the adoption of decentralized technology is yet to be fully seen.

The dawn of Shib OS is upon us, and the future is not just being built—it's being co-created. We invite you to step into this world, to explore the limitless potential of a system built for you, powered by you.

Join us as we witness firsthand how Shib OS is not just a set of tech pieces, but a revolution of ready-to-use systems poised to reshape the decentralized landscape, one empowered user at a time.

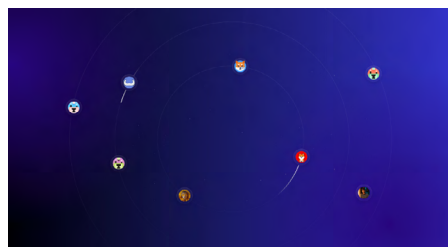

# Shib.io: The Digital Portal and the Heart of the Shiba Inu Ecosystem

Shib.io, the official Shiba Inu website, is ambitiously positioning itself as the core hub, a digital heart beating at the center of its decentralized world.

A website is quietly vying for prominence in the sprawling landscape of cryptocurrency, where decentralized networks often lack a central point of reference. Shib.io, the official online portal for the Shiba Inu project, is evolving from a simple information hub into a core hub; a digital nexus aiming to connect the disparate threads of this ambitious decentralized ecosystem.

## Shib.io: The Gateway to the Shiba Inu Universe

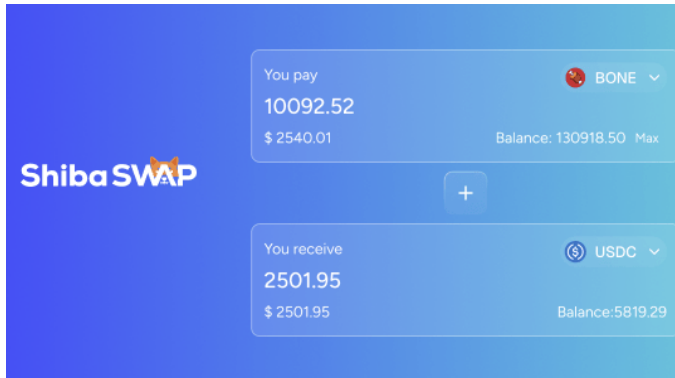

Shib.io is the official website of the Shiba Inu ecosystem, a centralized digital portal that brings together all the project's diverse components. It is the place where users can access token management tools, participate in governance, explore DeFi services, and discover upcoming projects.

The website is designed to be the first and most important stop for anyone looking to engage with the Shiba Inu ecosystem.

## Navigating the Ecosystem: A User-Friendly Experience

The homepage of Shib.io serves as an introduction to the Shiba Inu universe. Its intuitive interface and clear navigation make it easy for both newcomers and experienced users to find what they need.

The website's visual design, with its playful yet professional tone, reflects the spirit of the Shiba Inu community. Whether you're looking to access ShibaSwap, learn about the project's tokenomics, or connect with the community, Shib.io provides a seamless and user-friendly experience.

## Shib.io Core Features: Connecting the Ecosystem

Shib.io is a functional hub that connects users to the core features of the Shiba Inu ecosystem as detailed in its specific sections:

- **/ecosystem - The Ecosystem Overview:** This section provides a comprehensive overview of the Shiba Inu ecosystem, highlighting its various components, including ShibaSwap, Shibarium, Shib: the Metaverse, and the TREAT token. It emphasizes the interconnectedness of these elements and their role in creating a unified decentralized platform. It reinforces Shib.io's role as the central point for understanding the entire project.
- **/operating-system - Operating System:** serves as a comprehensive resource for understanding the Shiba Inu OS, providing a detailed overview of its architecture, core technologies, and interconnected components. This section is designed to give users a clear understanding of how the various parts of the system work together, from the foundational SHIB Alpha Layer and Shibarium to the FHE-Powered Execution Rollups and the various applications that are built on top of it. It also highlights the strategic integration of these technologies, and how they all work together to create a truly unique and powerful operating system. This section is designed to be a central hub for all information related to the Shiba Inu OS, and is a key resource for anyone looking to understand the system.
- **/airdrops - Airdrop Information:** This section provides information about past and upcoming airdrops within the Shiba Inu ecosystem. It details how users can participate in these events and claim their tokens. It highlights Shib.io's role in distributing rewards and engaging the community.
- **/tokens - Token Information:** This section provides detailed information about the various tokens within the Shiba Inu ecosystem, including SHIB, LEASH, BONE and TREAT. It explains their use cases, tokenomics, and how they contribute to the overall ecosystem. It reinforces Shib.io's role as the central source of truth for all token-related information.
- **/community - Community Engagement:** This section provides links to various community resources, including social media channels, forums, and educational materials. It emphasizes the importance of the Shiba Army and its role in driving the project forward. It highlights Shib.io's role in fostering community engagement and growth.
- **/news - Latest News and Updates:** This section

provides the latest news and updates about the Shiba Inu project, including announcements, partnerships, and development progress, all written by The Shib Daily and The Shib weekly magazine. It keeps the community informed about the project's ongoing activities and future plans, as well as the latest happenings in crypto, web3, blockchain and future tech. It reinforces Shib.io's role as the central source of official information.

- **/developers - Developer Resources:** This section provides resources for developers who want to build on the Shiba Inu ecosystem, including documentation, APIs, and SDKs. It encourages innovation and collaboration within the community and highlights Shib.io's role in fostering development and growth.

- **/get-in-touch/contact-us - Contact Information:** This section provides contact information for the Shiba Inu team, allowing users to reach out with questions, feedback, or partnership inquiries.

## Community Engagement and Growth: The Heart of the Revolution

Shib.io is designed to foster community engagement, providing a platform for updates, social media integration, and educational content. The website serves as a **central hub** for the Shiba Army, the passionate community that drives the project forward.

It is through Shib.io that newcomers can learn about the project, connect with other members, and become part of the Shiba Inu revolution.

## Shib.io: The Foundation for Long-Term Growth

Shib.io is a strategic component of the Shiba Inu project's long-term vision. It is the foundation upon which the project is building its future, a future that includes innovation in the crypto and NFT spaces, as well as a commitment to **decentralized governance**.

The website's role in the broader crypto market is to demonstrate that meme coins can evolve into serious players with real-world applications.

Shib.io is the beating heart of the Shiba Inu ecosystem. It is the gateway to ShibaSwap, Shib: The Metaverse, Shibarium and the community, providing users with the tools and information they need.

As the Shiba Inu ecosystem continues its ascent, challenging the status quo and pushing the boundaries of what's possible, Shib.io stands as a testament to the power of a **unified vision** and the enduring spirit of a decentralized dream. The future of Shiba Inu, and perhaps a glimpse of the future of decentralized finance itself, is being written, line by line, on the pages of Shib.io.

But as this digital citadel rises and as the Shiba Inu ecosystem continues to expand, one question lingers: Can a website, a single point of access in a decentralized world, truly become the heart of a revolution, or will the very nature of decentralization ultimately reshape its role?

## Shib OS FAQs

Unlock all the secrets of the Shib OS with this concise FAQ, your key to understanding its 37 transformative technologies and joining the decentralized revolution.

What if you could unlock the secrets to a decentralized future, right now? This isn't a hypothetical. Dive into the heart of the Shiba Inu Operating System (Shib OS) with this comprehensive guide, and finally understand the 37 transformative technologies that power it all.

### What is Shib OS?

**A:** A comprehensive operating system, powered by \$TREAT, that integrates over 30 cutting-edge pieces of tech to empower a decentralized future.

### What is the Shib Alpha Layer?

**A:** The foundation of Shib OS, providing ultra-fast transactions with high throughput for a global network state.

### What is the FHE-Powered Identity Stack?

**A:** A privacy-first system using FHE for secure, on-chain identity management and verifiable credentials.

### What are FHE Shibarium Transactions?

**A:** Secure transactions on Shibarium using Fully Homomorphic Encryption, with a fee in TREAT, while BONE remains the core gas token.

### What are FHE-Powered Execution Rollups (L3)?

**A:** Optimistic rollups built on the Shib Alpha Layer for private, efficient computation, using Shibarium for data availability.

### What is Super HUB FUN?

**A:** The central social network and discovery hub for all Shib OS dApps, communities, and businesses.

<https://unsplash.com/@element5digital>

### What is the Shiba Inu Doggy DAO?

**A:** A framework for community-driven governance, allowing each state to have its own on-chain DAO with 1-citizen-1-vote power.

### What is BURY 2.0?

**A:** A vote-escrow staking contract for SHIB, LEASH, BONE, and TREAT, enabling multi-purpose staking, governance, and state-specific currency versions.

### What are WOOF Wars?

**A:** A dynamic system (using ve-TREAT) where users direct liquidity farming rewards for maximum earnings.

### What is the Karma Engine?

**A:** A rewards platform for positive community actions, influencing voting, leaderboards and customizable per state.

### What is Reputation?

**A:** An on-chain service using Shib Attestation to create and assign reputations for all users and businesses.

### What is the Tournaments Engine?

**A:** A permissionless platform to create or sponsor tournaments on Shibarium.

### What are Gamified Rewards?

**A:** A system for easily creating giveaways, tournaments, and airdrops within the Shib OS ecosystem.

Unsplash/Choong Deng Xiang photo

### What is the Network State Analytics Engine?

**A:** An on-chain analytics tool to calculate key metrics like GDP and TVS for any state within the system.

### What is Shib Finance?

**A:** A DeFi suite (ShibaSwap) with identity/karma/reputation-based lending and borrowing features.

**What is SHIB Business?**

**A:** A set of products to help build businesses quickly with AI funding and cap table management.

**What is HUB Messaging?**

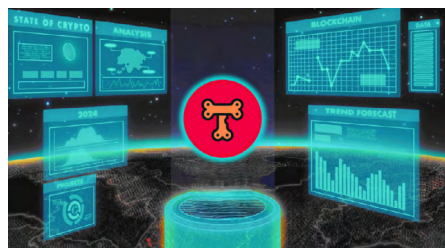

**A:** A decentralized, FHE-enhanced communications layer with token gating, paid memberships, and DAO integration.

**What is Encrypted Personal Data Storage?**

**A:** A self-custodial, encrypted data storage solution based on IPFS.

**What is SHIB Pay?**

**A:** A permissionless, self-custodial, on-chain payment system for websites and physical stores.

**What is the Shib Account Abstraction & Gasless SDK?**

**A:** A toolkit enabling gasless transactions for dApps, improving user onboarding and simplifying payment systems.

**What is Shib Wallet?**

**A:** A multi-chain wallet with portfolio tracking and smart features.

**What is SHIB Name Service?**

**A:** A domain name system for "name.shib" addresses, with ICANN TLD ambitions.

**What is Shib Marketplace?**

**A:** A [gasless NFT marketplace](#) on Shibarium for seamless creation and trading.

**What is The Shib?**

**A:** The official Shiba Inu digital magazine, and a key source of ecosystem information.

**What is The Shib Daily?**

**A:** A daily news reporting service for all things Shiba Inu.

**What are SHIBOSHIS?**

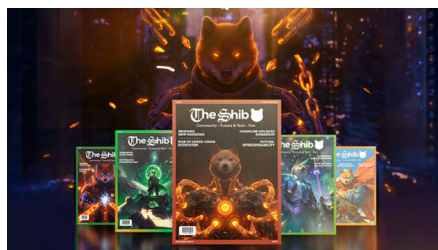

**A:** Collectible Shiba Inu NFTs (ERC721) with in-game and social club utilities.

**What are SHEboshis?**

**A:** Gas-efficient (DN404) female-focused NFTs with tokens and community-focused utilities.

**What are MV Land NFTs?**

**A:** NFT-based Metaverse parcels that can be combined into larger estates.

**What is The Shib NFT Collection?**

**A:** [Collectible NFTs](#) based on the covers of The Shib Magazine, commemorating major events in the ecosystem.

**What is Play with Shib?**

**A:** A gaming platform supporting on-chain titles tied to SHIB NFTs.

**What are NNFTs?**

**A:** A new token standard (ERC404 inspired) that allows tokens to convert to NFTs and vice versa.

**What is Shib: The Metaverse?**

**A:** An ultra-realistic metaverse built on Unreal Engine 5.4 with 11 HUBs and user-generated content.

**What is Woofvertising?**

**A:** A privacy focused advertising system powering Shiba Inu campaigns.

**What is the ShibArmy Influencer Marketplace?**

**A:** A marketplace connecting influencers and brands within the Shib OS ecosystem.

**What is the AI Agents Dashboard?**

**A:** A platform for creating and owning AI agents powered by community-managed DAOs.

**What is the Shib Attestation Service?**

**A:** An FHE-enabled framework on Ethereum, for creating and signing on-chain attestations.

**What is the Shib Events & Ticketing Engine?**

**A:** An on-chain system for creating and reselling event tickets, with royalties for creators.

You've now explored the core components of the Shib OS, unlocking a deeper understanding of its 37 transformative technologies. With this knowledge, the power to navigate, build, and contribute to the future of decentralization is now in your hands. The journey begins here.

## Crypto's Crossroads: Navigating the Future Under a Trump Presidency

Trump's presidency has thrust the cryptocurrency industry into a new era, where the promise of decentralization now collides with the realities of political power and personal ambition.

The cryptocurrency industry, once a rebellious outsider, now finds itself under the gaze of a president who has both embraced and exploited its potential, leaving its future hanging in the balance.

U.S. President Donald Trump's journey from a crypto skeptic to a self-proclaimed champion has set the stage for a new era in the digital asset space. His administration's approach to cryptocurrency is poised to have a profound impact on the industry, shaping its regulatory landscape, fostering innovation, and influencing its adoption by mainstream [institutions](#) and individuals.

The question now is not just about what has happened, but what the future holds for crypto under his leadership.

## Regulatory Landscape Under Trump: A Shift Towards Laissez-Faire?

One of the most significant changes expected under the Trump administration is a shift toward a more relaxed regulatory approach to cryptocurrency. Trump's campaign promising to make the United States the "crypto capital of the planet" suggests a move away from the stricter regulations that characterized the previous administration.

This could lead to a more favorable environment for crypto companies, potentially attracting investment and fostering innovation. However, it also raises concerns over the potential for increased risk and market manipulation, requiring a careful balance between innovation and investor protection.

## Campaign Promises, Crypto Donations, and the Role of Crypto-Friendly Appointees

Trump's embrace of crypto was not just rhetorical. He became the first presidential candidate to accept digital assets for campaign donations, utilizing Coinbase Commerce to facilitate these transactions. This move signaled a significant shift in the political landscape, with cryptocurrency becoming a legitimate form of campaign finance.

The crypto industry, in turn, responded with enthusiasm, with many "crypto honchos" and companies donating to his campaign, hoping to benefit from his promised regulatory reforms.

Trump's appointment of crypto-friendly officials to key positions, such as the SEC, signals a significant shift in the direction of regulation. These appointees, with their understanding of the crypto industry, are likely to shape policies that are more favorable to digital assets.

This could lead to a more streamlined regulatory process and make it easier for crypto companies to operate in the United States. However, it also raises concerns about potential conflicts of interest and the influence of the crypto industry on government policy.

Credit: Layer3

As Anndy Lian, Intergovernmental Blockchain Expert, commented, "Trump's decision to bring in crypto enthusiasts into the government has got everyone talking. I feel that it's like a breath of fresh air for the crypto industry."

We're looking at potentially easier regulations, more innovation, and maybe even the U.S. becoming a hub for digital currencies. Imagine having officials who actually get blockchain and aren't just there to clamp down on it."

He added, "That could mean a boom for crypto startups and investors. But, let's not jump for joy just yet. There's a flip side that's got people worried. We're talking about the risk of too little regulation leading to scams, fraud, and all sorts of shady business. If the government goes too easy, we could see a Wild West scenario where only the wild-est survive. Not to mention, if these officials are too cozy with the crypto bigwigs, we might just see a bit of crony capitalism."

Lian then posed a critical question, immediately providing the solution, "So, how should the industry play this? Keep pushing for clear, sensible rules that protect investors without stifling innovation. Engage with these new faces in government, educate them on the real-world implications of their policies, and make sure the conversation includes voices from all corners of the crypto community, not just the big players."

Lian further added, "\$TRUMP's triumph could mark a new ICO era in 2025."

## The Launch of \$TRUMP: A Meme Coin Phenomenon?

Just days before his inauguration, the Trump family launched its own meme coin, \$TRUMP. This move, while praised by some as a sign of crypto going mainstream, also sparked intense criticism and ethical questions.

Within just days, the \$TRUMP token surged to become one of the most valuable forms of digital currency in the world, with a total trading value of nearly \$13 billion and a total of \$29 billion worth of trades. This created the potential for a multibillion-dollar payout to the Trump family, raising concerns about conflicts of interest.

The rapid rise of \$TRUMP also raised concerns about market manipulation and insider trading. Within minutes of the coin's launch, a crypto trader accumulated a \$1 million position, which they quickly sold for \$20 million, prompting speculation about insider knowledge.

Furthermore, it was revealed that the Trump team appeared to control another 800 million tokens, potentially worth as much as \$51 billion, raising questions about the fairness and transparency of the market.

"From a more professional take, \$TRUMP memecoin fiasco, with all its ethical red flags and whispers of insider trading, has really put the spotlight on how the crypto world handles transparency and [accountability](#). It's clear we need to clean up our act," said Lian, who is a renowned keynote speaker in the industry.

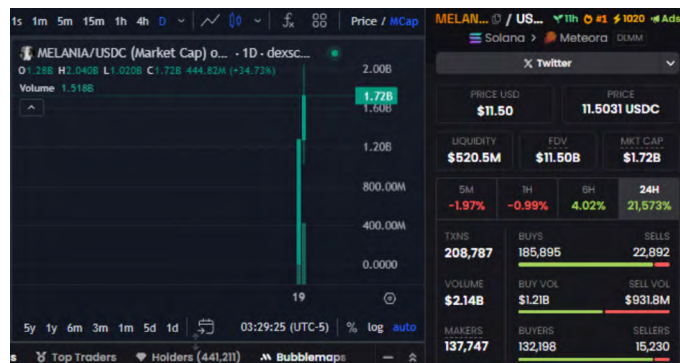

"First off, the industry should push for more robust regulatory frameworks that aren't just there for show but actually enforce fair play. We're talking about mandatory audits, especially for tokens linked to high-profile names, to ensure launch practices are above board. Transparency in token distribution is another big one; no more of this cloak-and-dagger stuff where only a select few get the heads-up before the public. [Smart contracts](#) should be open for anyone to scrutinize, and there should be clear, public records of token allocations," he added.

"Also, platforms need to beef up their security and monitoring to catch any fishy business before it blows up. Community involvement is key too; let's empower token holders with more decision-making power through governance models that are genuinely democratic. And finally, the industry should foster a culture where whistleblowing is celebrated, not feared, to keep everyone in check. If we don't sort this out, we're just inviting more skepticism and less mainstream adoption," he further said.

## The \$MELANIA Coin and Market Volatility

Adding to the controversy, a second memecoin, \$MELANIA, after the first lady, was launched just as President-elect Trump was about to start his inauguration rally. This move coincided with a sharp drop in the value of \$TRUMP, highlighting the volatility and speculative nature of memecoins.

While the \$MELANIA token quickly reached a market cap of \$6 billion, concerns were raised about its distribution, with nearly 90% of the supply held in a single wallet.

## Crypto Weighs In

"The market is losing its mind over the \$TRUMP coin, and completely missing the plot," said [Jeff Dorman, CIO at Arca](#). "This is going to be incredibly long-term bullish for the industry... the President himself is both an issuer and an investor."

However, not all in the industry were enthusiastic. "I don't like it," commented Bloomberg Intelligence Senior ETF Analyst Eric Balchunas, [calling it](#) "exploitative" and an "unforced error in the making."

"Dropping TRUMP meme coin 2 days before becoming president is nasty work," said [CoffeZilla](#), a self-proclaimed internet detective. "New SEC/DOJ guarantees no prosecution... should be a crime but crime is legal now ig?"

Research wizard [Ardizor](#) highlighted the potential for insider trading, noting that "these wallets have made GENERATIONAL WEALTH in the past 24 hours. Over \$400 million in profits."

Credit: [@ardizor](#)

José Maria Macedo, Cofounder at Delphi Labs, [said on X](#), "My read is that the insiders who helped launch \$TRUMP didn't realise how much it would pump and either didn't buy enough or sold too early... In their greed they nuked \$30b of value, transformed the optics into pure grift, and probably committed a bunch of crimes too."

Adam Cochran [added](#), "So the president elect's crypto team extracted \$500m+ from selling a memecoin on Solana and is now Sayloring it into ETH."

"The whole \$TRUMP and \$MELANIA meme coin thing has really thrown the crypto world into a bit of a frenzy," Lian told The Shib. "On one side, it's kind of cool because it might get more people interested in crypto who normally wouldn't give it a second look. The buzz around these coins could make crypto seem less like some tech jargon and more like something fun and accessible. But, let's be real here, there's a downside."

The intergovernmental expert and book author noted, "A lot of folks are worried it's just another pump-and-dump game, which doesn't exactly scream 'legit investment.' It paints crypto in this light where it looks more like a gamble than a solid financial move."

He further said, "And if people start thinking that all crypto is just about wild speculation linked to big names, it could scare off the more cautious investors or those looking for something with a bit more stability. Plus, if these coins seem like nothing more than a celebrity exploiting their fame for quick bucks, it could make the whole crypto market look shady and unregulated, which might chill out the whole idea of crypto going mainstream."

## What Lies Ahead?

President Trump's embrace of cryptocurrency has ushered in a new era for the industry, marked by both unprecedented opportunities and significant ethical concerns. The launch of the \$TRUMP and \$MELANIA meme coins has created a complex landscape, raising questions about market manipulation, insider trading, and the potential for harm to amateur traders.

As the Trump administration takes office, the crypto industry will be closely watching to see how these developments will shape the future of digital currencies in the United States. Some are expressing regret for campaigning for Trump, others expressed their desire to reinstate Gary Gensler in the SEC.

With all the chaos in the market over the weekend caused by these surprising token launches from Trump's camp, the crypto industry raised the question: "what is the future of crypto under this new administration?" "Will the crypto industry achieve the ultimate reason behind the creation of cryptocurrency, especially Bitcoin?"

## ChewySwap Launches All-New TREAT Farming, Bridges, and DEX Aggregation!

ChewySwap unleashes a suite of DeFi power tools—TREAT Farm, portfolio tracker, DEX aggregator, and cross-chain bridge—for effortless earning and trading on Shibarium.

By: Jim, ChewySwap

Shibizens, it's time to level up your DeFi game! ChewySwap has been hard at work expanding its ecosystem, and the result is a suite of powerful tools designed to enhance your Shibarium experience. From earning rewards in the [TREAT Farm](#) to tracking your assets with the Portfolio Tracker, trading smarter with the DEX Aggregator, and bridging assets across chains with the Cross-Chain Shibarium Bridge, ChewySwap is your ultimate gateway to the Shibarium network.

Let's break down these exciting updates and how they make navigating Shibarium easier and more rewarding than ever.

## 1. TREAT Farm: Earn Rewards and Boost Shibarium's Liquidity

The launch of the [TREAT-BONE farming pool](#) on ChewySwap is a huge milestone for the Shiba Inu ecosystem. This farm allows users to add liquidity for the TREAT-BONE pair, stake their LP tokens, and earn \$CHEWY rewards.

Here's why the TREAT farm is a must-join:

- **Dual Rewards:** Liquidity providers earn not just trading fees but also bonus TREAT tokens.
- **Governance Control:** Stake veTREAT (vote escrowed TREAT) to influence liquidity pair rewards through dynamic gauge voting, giving you a say in how rewards are distributed.
- **Support Shibarium:** By farming TREAT, you're contributing to increasing TREAT's liquidity on Shibarium, strengthening the ecosystem.

This is your chance to actively grow the ecosystem while earning lucrative rewards. Visit ChewySwap today to start farming!

## 2. Portfolio Tracker: Manage Your Assets with Ease

Tired of switching between multiple apps and tools to track your crypto assets? The new ChewySwap Portfolio Tracker is here to simplify your life. This feature lets you easily monitor your holdings, including [liquidity pool](#) stakes, rewards, and more — all from one convenient dashboard.

The Portfolio Tracker is your go-to tool for staying organized and making informed decisions as you navigate the Shibarium ecosystem.

## 3. DEX Aggregator: Find the Best TREAT Swaps Across Multiple Platforms

[ChewySwap's DEX Aggregator](#) is your personal trading assistant, ensuring you always get the best value for your swaps. The aggregator scans multiple decentralized exchanges to find the most efficient token paths and the best prices for your trades.

### Why use the ChewySwap DEX Aggregator?

- **Save Money:** Optimize your trades to minimize slippage and fees.
- **Trade Smarter:** Find the most favorable swap rates without manually comparing platforms.
- **All-in-One Convenience:** Access the aggregator directly from ChewySwap's intuitive interface.

With TREAT now live on ChewySwap, the DEX Aggregator makes trading more efficient and cost-effective than ever before.

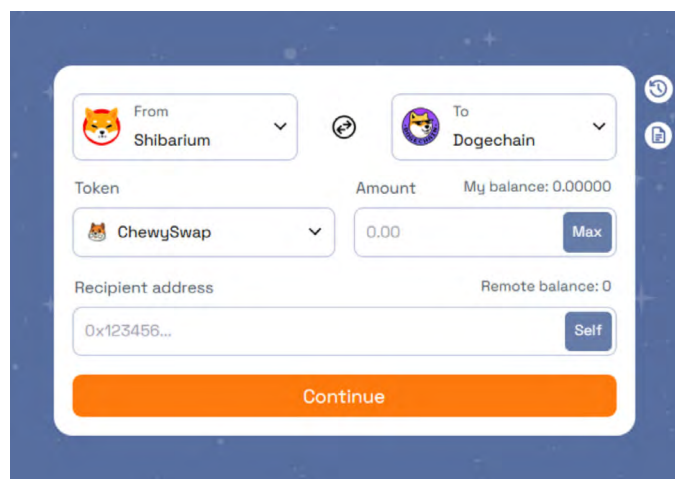

## 4. Cross-Chain Shibarium Bridge: Seamlessly Move Assets

Bridging your assets between networks just got easier with the ChewySwap Cross-Chain Shibarium Bridge. This powerful tool allows you to move tokens between Shibarium and other supported chains effortlessly, opening up a world of possibilities for liquidity, trading, and earning.

### Key benefits of the Shibarium Bridge:

- **Expand Liquidity:** Bring assets from other networks to Shibarium to participate in farming and trading.
- **Simplify DeFi:** No more juggling wallets or complex processes—bridge your assets in a few clicks.
- **Unlock Opportunities:** With seamless cross-chain functionality, you can explore new earning and investment opportunities across ecosystems.

The Shibarium Bridge is your gateway to a truly interconnected DeFi experience.

### Why ChewySwap Is Leading the Way on Shibarium

With these new features, ChewySwap is making it easier than ever to trade, farm, track, and move your assets on Shibarium. Whether you're earning rewards in the TREAT Farm, optimizing your trades with the DEX Aggregator, or bridging assets between chains, ChewySwap is the ultimate [one-stop platform](#) for DeFi enthusiasts.

Ready to dive in? Visit ChewySwap today and explore everything it has to offer. The future of Shibarium starts here, and you don't want to miss it!

**Final Reminder:** TREAT is still in its early stages, so liquidity may be low for now. Trade responsibly and keep an eye on market conditions as the ecosystem continues to grow. Let's build the Shibarium network together!

## DOGGIE TREATS

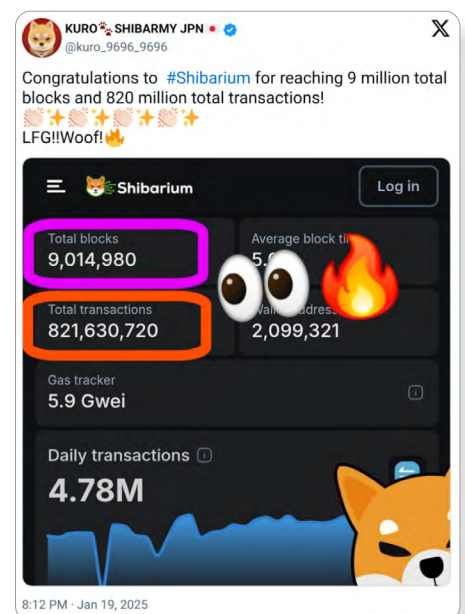

ICYMI Shib Army:

We have so much to celebrate and look forward to—from Shibarium surpassing 9 million blocks to impressive achievements from partner projects, plus the latest partnership! Remember, these are the key takeaways from today's highlights: #AllHailSHIB and #BridgeToShibarium.

### Block Party Alert: Celebrate 9 Million Blocks and Discover Why Shibarium Is the Top Dog

Let's raise a toast to the Shibarium community for celebrating 9 million blocks and over 820 million transactions! So our question for those who are still sitting on the sidelines: with all the ongoing complaints about other blockchains, isn't it time to make that move to Shibarium?
